QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-38089

ASV HOLDINGS, INC.

(Exact Name of Registrant as Specified in its Charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

840 Lily Lane

Grand Rapids, MN

(Address of principal executive offices)

82-1501649

(I.R.S. Employer
Identification No.)

55744

(Zip Code)

Registrant's telephone number, including area code: (218) 327-3434

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input checked="" type="checkbox"/>
Emerging growth company	<input checked="" type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 4, 2018, the registrant had 9,822,217 shares of common stock, \$0.001 par value per share, outstanding.

ASV Holdings, Inc.
Notes to Unaudited Condensed Financial Statements
(In thousands, except par value and per share data)

Note 1. Basis of Presentation

Nature of Operations

ASV Holdings, Inc. (the “Company” or “ASV”) primarily designs, manufactures and markets compact track loaders and skid steer loaders as well as related parts for use primarily in the construction, landscaping, and agricultural industries. The Company’s headquarters and manufacturing facility is located in Grand Rapids, Minnesota. Products are marketed and sold in North America, Australia, New Zealand and Latin America.

Corporate Conversion and Initial Public Offering

On May 11, 2017, pursuant to a Plan of Conversion adopted by the Members and Board of Managers of A.S.V., LLC as of April 25, 2017, the Company converted from a Minnesota limited liability company into a Delaware corporation and changed its name from A.S.V., LLC to ASV Holdings, Inc. In conjunction with this corporate conversion, the Company filed a certificate of incorporation (the “Certificate of Incorporation”) with the Secretary of State of the State of Delaware and the bylaws of the Company (the “Bylaws”) became effective. Both the Certificate of Incorporation and the Bylaws were approved by the Board of Managers and Members of A.S.V., LLC prior to corporate conversion. Pursuant to the Company’s Certificate of Incorporation, the Company is authorized to issue up to 50,000 shares of common stock \$0.001 par value per share and 5,000 shares of preferred stock \$0.001 par value per share. All references in the unaudited interim condensed financial statements to the number of shares and per-share amounts of common stock have been retroactively restated to reflect the corporate conversion.

On May 17, 2017, the Company completed its underwritten initial public offering (“IPO”) of 3,800 shares of the Company’s common stock, including 1,800 shares sold by the Company and 2,000 shares sold by Manitex International, Inc. (“Manitex”), at a price to the public of \$7.00 per share. After underwriting discounts and commissions and offering expenses payable by the Company, the Company received net proceeds of \$10,405 from the offering. The Company did not receive any proceeds from the sale of shares by Manitex.

On May 23, 2017, the underwriters exercised their over-allotment option in full by purchasing an additional 570 shares of the Company’s common stock from A.S.V. Holding, LLC, a selling stockholder in the IPO and subsidiary of Terex Corporation (“Terex”), at the IPO price of \$7.00 per share, less underwriting discounts and commissions. The Company did not receive any proceeds from the sale of the shares by A.S.V. Holding, LLC.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The unaudited financial statements, included herein, have been prepared by the Company pursuant to the rules and regulations of the United States Securities and Exchange Commission (the “SEC”). Pursuant to these rules and regulations, the financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial statements and have been consistently applied. These unaudited financial statements should be read in conjunction with the Company’s audited financial statements and related notes included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

The unaudited financial statements include all adjustments of a normal, recurring nature considered necessary for a fair presentation of our financial position as of March 31, 2018 and the results of operations for the three months ended March 31, 2018 and 2017. Results of operations for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the year ended December 31, 2018.

Critical Accounting Policies and Estimates

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which require the Company to make estimates, judgments and assumptions that affect the reported amounts of certain assets, liabilities, revenues, expenses and related disclosures and contingencies. The Company evaluates estimates used in preparation of the accompanying financial statements on a continual basis. We describe our significant accounting policies in Note 2, “Summary of

Significant Accounting Policies,” of the audited financial statements for the year ended December 31, 2017 included in the Annual Report on Form 10-K.

Recent Accounting Pronouncements

Recent accounting pronouncements are described in Note 6, “Recent Accounting Pronouncements.”

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company’s best estimate of the amount of probable credit losses in its existing accounts receivable. The Company determines the allowance based on individual customer review and current economic conditions. The Company reviews its allowance for doubtful accounts at least quarterly. Individual balances exceeding a threshold amount that are over 90 days past due are reviewed individually for collectability. All other balances are reviewed on a pooled basis by type of receivable. Account balances are charged off against the allowance when the Company determines it is probable the receivable will not be recovered.

The balance of the allowance for doubtful accounts was \$119 and \$82 at March 31, 2018 and December 31, 2017, respectively.

Revenue Recognition

The Company’s revenues result from the sale of goods or services and reflect the consideration to which the Company expects to be entitled. The Company records revenue based on a five-step model in accordance with Accounting Standards Codification (“ASC”) 606, Revenue from Contracts with Customers (“ASC 606”). For its customer contracts, the Company identifies the performance obligations (goods or services), determines the transaction price, allocates the contract transaction price to the performance obligations, and recognizes the revenue when (or as) the performance obligation is satisfied. A good or service is transferred when the customer obtains control of that good or service. The Company principally generates revenue from the sale of equipment and parts to dealers, distributors and OEM customers and recognizes revenue at a point in time when control transfers. Transfer of control is generally determined based on the shipping terms of the contract. The Company recognizes revenue for delivered goods or services when the delivered good or service is distinct, control of the good or service has transferred to the customer, and only customary refund or return rights related to the goods or services exist. Generally, there is no-post shipment obligation on product sold other than standard warranty obligations in the normal and ordinary course of business.

Provisions for sales program incentives (such as wholesale subsidies, retail subsidies and customer cash), product returns, and discounts and allowances are variable consideration and are accounted for as a reduction of revenue and establishment of a liability (or contra asset receivable as appropriate) using the expected value method. The Company considers historical data in determining its best estimates of variable consideration. These estimates are reviewed regularly for appropriateness, considering also whether the estimates should be constrained in order to avoid a significant reversal of revenue recognition in a future period. If updated information or actual amounts are different from previous estimates of variable consideration, the revisions are included in the results for the period in which they become known through a cumulative effect adjustment to revenue. In addition, the Company’s contracts with customers generally do not include significant financing components or noncash consideration. The Company expenses incremental costs of obtaining a contract (primarily sales commissions) as Selling, general and administrative expense in the Condensed Statements of Operations, because the amortization period would be less than one year.

The Company disaggregates revenue from contracts with customers by geographic location and major customer (see Concentrations Of Business and Credit Risk) as we believe this best depicts how the nature, amount, timing and uncertainty of our revenue and cash flows are affected by economic factors.

Accrued Warranties

The Company records accruals for potential warranty claims based on its claim experience. The Company’s products are typically sold with a standard warranty covering defects that arise during a fixed period.

A liability for estimated warranty claims is accrued at the time of sale. The liability is established using historical warranty claim experience for each product sold. Historical claim experience may be adjusted for known design improvements or for the impact of unusual product quality issues. Warranty reserves are reviewed quarterly to ensure critical assumptions are updated for known events that may affect the potential warranty liability.

Litigation Claims

In determining whether liabilities should be recorded for pending litigation claims, the Company must assess the allegations and the likelihood that it will successfully defend itself. When the Company believes it is probable that it will not prevail in a particular matter, it will then record an estimate of the amount of liability based, in part, on advice of outside legal counsel.

Defined Benefit Plan

The Company sponsors a nonqualified Supplemental Executive Retirement Plan (“SERP”) for a former senior executive. The SERP is unfunded. The Company accounts for this plan pursuant to the Financial Accounting Standards Board’s (“FASB”) Accounting Standards Codification (“ASC”) 710, “Compensation – General.” This guidance requires balance sheet recognition of the overfunded or underfunded status of the defined benefit plan. Actuarial gains and losses, prior service costs or credits, and any remaining transition assets or obligations that have not been recognized under previous accounting guidance must be recognized in the Statement of Operations. The defined benefit obligation for this plan as of March 31, 2018 is \$745, of which, \$64 and \$681 is reflected in “Accrued Other” and “Other Long-Term Liabilities,” respectively, on the balance sheet. The balance at December 31, 2017 was \$803, of which, \$64 and \$739 was reflected in the “Accrued Other” and “Other Long-Term Liabilities,” respectively. The Company expects to make annual benefit payments of \$64 per year over the next five years.

Research and Development Costs

Research and development costs are expensed as incurred. Such costs are incurred in the development of new products or significant improvements to existing products.

Income Taxes

The Company’s provision for income taxes consists of federal and state taxes, as applicable, in amounts necessary to align the Company’s year-to-date tax provision with the effective rate that it expects to achieve for the full year. Each quarter the Company updates its estimate of the annual effective tax rate and records cumulative adjustments as necessary. For the three months ended March 31, 2018, the Company recorded an income tax benefit of \$(81), which consists of a federal and state income tax benefit on its pre-tax loss of \$(388). Our effective tax rate is affected by recurring items such as state and local taxes, a reduced federal tax rate for foreign derived intangible income and federal research and development credits.

For the three months ended March 31, 2017, the Company did not record an income tax provision as prior to May 11, 2017, the Company was taxed as a partnership. As such, the Company was not a tax paying entity and not subject to federal and state income tax purposes.

At March 31, 2018, the Company did not have any uncertain tax positions. The Company records interest and penalties related to uncertain tax positions in the provision for income taxes in the accompanying Statement of Income.

Concentrations of Business and Credit Risk

Caterpillar Inc., an OEM customer, and CEG Distributions PTY Ltd., the Company’s Australian master distributor, accounted for 26% of the Company’s Net Sales for the three months ended March 31, 2018 as well as 64% of the Company’s Accounts Receivable at March 31, 2018. Caterpillar Inc. and CEG Distributions PTY Ltd accounted for 26% of the Company’s Net Sales for the period ended March 31, 2017 as well as 63% of the Company’s Accounts Receivable at December 31, 2017.

Sales by major customer consisted of the following for the three months ended March 31, 2018 and 2017:

	For the Three Months Ended March 31, 2018		For the Three Months Ended March 31, 2017	
	Percent of Total	Amount	Percent of Total	Amount
Caterpillar	16%	\$ 4,822	16%	\$ 4,525
CEG Distributions PTY Ltd.	10%	2,895	10%	2,883
Other	74%	22,153	74%	20,602
Total	100%	\$ 29,870	100%	\$ 28,010

Any disruptions to these two customer relationships could have adverse effects on the Company's financial results. The Company manages dealer and OEM concentration risk by evaluating in advance the financial condition and creditworthiness of its dealers and OEM customers. The Company establishes an allowance for doubtful accounts receivable, if needed, based upon expected collectability. Any reserves established for doubtful accounts is determined on a case-by-case basis when it is believed the payment of specific amounts owed to us is unlikely to occur. Although the Company has encountered isolated credit concerns related to its dealer base, management is not aware of any significant credit risks related to the Company's dealer base and generally does not require collateral or other security to support account receivables, other than UCC related sales. The Company has secured a credit insurance policy for certain accounts with a policy limit of liability of not more than \$8,600.

Revenue by geographic area consisted of the following for the three months ended March 31, 2018 and 2017:

	For the Three Months Ended March 31,			
	2018		2017	
	Percent of Total	Amount	Percent of Total	Amount
United States	79%	\$ 23,627	72%	\$ 20,302
Australia	11%	3,361	19%	5,227
Other	10%	2,882	9%	2,481
Total	100%	\$ 29,870	100%	\$ 28,010

Note 3. Inventory

Inventory is stated at the lower of cost (first-in, first-out) or net realizable value. The Company records excess and obsolete inventory reserves. The estimated reserve is based on specific identification of excess or obsolete inventories.

Inventory consisted of the following as of March 31, 2018 and December 31, 2017:

	March 31, 2018	December 31, 2017
Raw materials and supplies	\$ 18,647	\$ 17,108
Work in process	119	98
Finished equipment and replacement parts	9,817	10,076
	28,583	27,282
Less: reserves for excess and obsolete	(554)	(591)
	\$ 28,029	\$ 26,691

Note 4. Goodwill and Other Intangible Assets

Intangible Assets

Intangible assets include patented and unpatented technology, trade names, customer relationships and other specifically identifiable assets and are amortized on a straight-line basis over their respective estimated useful lives, which range from ten to twenty-five years. Intangible assets are reviewed for impairment when facts and circumstances indicate a potential impairment has occurred.

There are three fundamental methods applied to value intangible assets outlined in FASB ASC 820, "Fair Value Measurement." These methods include the Cost Approach, the Market Approach, and the Income Approach. Each of these valuation approaches were considered in the Company's estimation of value.

Trade names and trademarks, patented and unpatented technology: Valued using the Relief from Royalty method, a form of both the Market Approach and the Income Approach. Because the Company has established trade names and trademarks and has developed patented and unpatented technology, the Company estimated that the benefit of ownership as the relief from the royalty expense that would need to be incurred in absence of ownership.

Customer relationships: Because there is a specific earnings stream that can be associated with customer relationships, the Company determined the fair value of these relationships based on the excess earnings method, a form of the Income Approach.

Technology: The Company holds a number of U.S. patents covering its undercarriage technology. The key patent related to the Company's Posi-Track undercarriage and suspension expires in 2023. The average estimated useful life for the Company's patents is ten years, but useful life is determined in part by any legal, regulatory or contractual provisions that limit useful life. The Company has and will continue to dedicate technical resources toward the further development of our products and processes in order to maintain its competitive position.

Intangible assets, net comprised the following as of March 31, 2018:

	<u>Weighted Average Life (In Years)</u>	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Carrying Amount</u>
Patents and unpatented technology	10	\$ 8,000	\$ (2,627)	\$ 5,373
Tradename and trademarks	25	7,000	(918)	6,082
Customer relationships	11	16,000	(4,815)	11,185
	<u>12</u>	<u>\$ 31,000</u>	<u>\$ (8,360)</u>	<u>\$ 22,640</u>

Intangible assets, net comprised the following as of December 31, 2017:

	<u>Weighted Average Life (In Years)</u>	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Carrying Amount</u>
Patents and unpatented technology	10	\$ 8,000	\$ (2,427)	\$ 5,573
Tradename and trademarks	25	7,000	(848)	6,152
Customer relationships	11	16,000	(4,448)	11,552
	<u>12</u>	<u>\$ 31,000</u>	<u>\$ (7,723)</u>	<u>\$ 23,277</u>

Amortization of other intangible assets for the three months ended March 31, 2018 and 2017 was \$637 and \$637, respectively.

Goodwill

Goodwill, representing the difference between the total purchase price and the fair value of assets (tangible and intangible) and liabilities at the date of acquisition, is reviewed for impairment annually, and more frequently as circumstances warrant, and written down only in the period in which the recorded value of such assets exceed their fair value. The Company selected September 30 as the date for the required annual impairment test.

Note 5. Related Party Transactions

Effective December 19, 2014, the Company entered into a Distribution and Cross Marketing Agreement with Terex and Manitex (the "Terex Cross Marketing Agreement") that set forth the terms under which the Company would manufacture and sell ASV products, certain services Terex would provide in assisting in the sales and marketing of ASV products and the costs to be paid by the Company in exchange for such services. The Terex Cross Marketing Agreement defines dealers and customers to which, and territories for which, Terex would have the exclusive right on behalf of the Company to market and sell Terex-branded ASV products. The Terex Cross Marketing Agreement defines the compensation to Terex for its machine sales selling expense, part sales selling expense and general and administrative costs associated with such sales. In addition, for the provision of marketing services by Terex, the Company would pay an annual fee of \$250, subject to annual escalation of 3% plus 0.2% of net incremental sales. Unless terminated, the term of the Terex Cross Marketing Agreement is five years, and the parties may agree to renew for additional one year terms. The Company expensed \$300 and \$296 for services for the three months ended March 31, 2018 and 2017, respectively, under the Terex Cross Marketing Agreement.

Effective December 19, 2014, the Company entered into a Services Agreement with Terex (the "Terex Services Agreement") that set forth the terms under which Terex would provide certain services to the Company and the Company will retain access to certain services provided by Terex and the compensation related thereto. The scope of the Terex Services Agreement covers amongst other items, temporary transition services arising from the transfer of majority ownership to Manitex, third party logistics services for parts fulfillment, warranty and field service and information technology ("IT") services for both transitional and ongoing services. Unless terminated, the term of the Terex Services Agreement is specific to each service provided, and the parties may agree to renew for additional one year terms. The Company expensed \$242 and \$353 for services provided for the three months ended March 31, 2018 and 2017, respectively.

Effective March 27, 2017, the Company entered into a Winddown and Termination of Distribution and Cross Marketing Agreement and Services Agreement with Terex and Manitex (the "Winddown Agreement"). Pursuant to the Winddown Agreement, Terex will continue to provide certain services to the Company following the completion of the IPO under the Terex Cross Marketing Agreement and the Terex Services Agreement, including parts sales, shipment and purchases and parts planning, customer parts phone support, and administrative services, including IT support and accounting input information for parts cost and pricing. Pursuant to the Winddown Agreement, these services will continue on a transitional basis. Terex no longer markets ASV machines under the Terex Cross Marketing Agreement and the Company is responsible for marketing all ASV machines to all distribution channels, but Terex will continue to market ASV parts under the Terex Cross Marketing Agreement during transition period. Pursuant to the Winddown Agreement, the Company will be permitted to produce and sell Terex-branded ASV products to existing Terex dealers and continue to use applicable Terex trademarks during the transition period and for one year after termination of the Winddown Agreement. The Company has the right to terminate any service related to parts sales and distribution upon six months' notice to Terex, and the Company also has the right to terminate all services upon six months' notice to Terex. After one year from the date of the Winddown Agreement, Terex will also have the right to terminate services upon six months' notice. In no event will the services continue beyond December 19, 2019. The Winddown Agreement does not immediately terminate the Terex Cross Marketing Agreement or the Terex Services Agreement, each of which will remain in effect until terminated in accordance with the Winddown Agreement. By notice dated October 5, 2017, the Company provided notice to Terex and Manitex of the termination, effective as of April 5, 2018, of all services provided by Terex thereunder. Such notice also indicated that, also effective as of April 5, 2018, the Terex Cross Marketing Agreement and Terex Services Agreement shall also be deemed terminated.

Included in the Company's Condensed Statements of Operations are sales to Terex of \$31 and \$131 for the three months ended March 31, 2018 and 2017, respectively. Also included are sales returns from Manitex of \$-9 for the three months ended March 31, 2017. The Company recorded purchases from Terex of \$2,182 and \$2,132 for the three months ended March 31, 2018 and 2017 respectively. The Company also recorded charges for insurance and employee benefit costs from Manitex of \$968 for the three months ended March 31, 2017.

Receivables from affiliates include \$30 due from Terex and \$3 due from Manitex (total \$33) at March 31, 2018, and \$67 due from Terex and \$9 due from Manitex (total \$76) at December 31, 2017.

Payables from affiliates includes \$1,200 due to Terex and \$0 due to Manitex (total \$1,200) at March 31, 2018, and \$1,037 due to Terex and \$26 due to Manitex (total \$1,063) at December 31, 2017.

Note 6. Recent Accounting Pronouncements

Recently Adopted Accounting Pronouncements

Effective January 1, 2018, we adopted the Financial Accounting Standards Board ('FASB') Accounting Standards Update ('ASU') No. 2014-09, Revenue from Contracts with Customers (Topic 606) ("ASU 2014-09"), and ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date, which deferred the effective date of ASU 2014-09 by one year. ASU 2014-09 supersedes the revenue recognition requirements in ASC 605, Revenue Recognition, and is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. It also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue, cash flows arising from customer contracts, including significant judgments and changes in judgments, and assets recognized from costs incurred to obtain or fulfill a contract. The adoption of ASU 2014-09, using the modified retrospective approach, had no significant impact on our results of operations, cash flows, or financial position. Revenue continues to be recognized at a point in time for our product sales when products are delivered to or picked up by the customer and revenue for shipping and handling charges continues to be recognized when products are delivered to or picked up by the customer. We continue to reduce revenue for estimates of sales incentives based on probability estimates and for product returns based on historical return rates. Additional information and disclosures required by this new standard are contained in Note 2, "Revenue Recognition".

Recent Accounting Pronouncements – Not Yet Adopted

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities," ("ASU 2016-01"), subsequently clarified in February 2018 by ASU No. 2018-03, "Technical Corrections and Improvements to ASU 2018-01" ("ASU 2018-03"). The amendments in ASU 2016-01, and the clarification in ASU 2018-03, among other things, require equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; require public business entities to use the exit price notion when measuring fair value of financial instruments for disclosure purposes; require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e., securities or loans and receivables); and eliminate the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate fair value that is required to be disclosed for financial instruments measured at amortized cost. The effective date will be the first quarter of fiscal year 2019, for emerging growth companies. The Company is evaluating the impact that adoption of this new standard will have on its financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)," ("ASU 2016-02"). ASU 2016-02 requires lessees to recognize on the balance sheet the assets and liabilities associated with the rights and obligations created by those leases. The guidance for lessors is largely unchanged from current U.S. GAAP. Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months. Consistent with current U.S. GAAP, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. The effective date will be the first quarter of fiscal year 2020, for emerging growth companies, with early adoption permitted. The Company is evaluating the impact that adoption of this new standard will have on its financial statements.

In August 2016, the FASB issued ASU No. 2016-15, "Classification of Certain Cash Receipts and Cash Payments (Topic 230): Statement of Cash Flows" ("ASU 2016-15"), which clarifies how entities should classify certain cash receipts and cash payments on the statement of cash flows. ASU 2016-15 also clarifies how the predominance principle should be applied when cash receipts and cash payments have aspects of more than one class of cash flows. ASU 2016-15 is effective for fiscal years and interim periods beginning after December 15, 2018, for emerging growth companies. The Company is currently evaluating the impact that this standard will have on its financial statements.

In January 2017, the FASB issued ASU No. 2017-04, "Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment," which simplifies the measurement of goodwill impairment by eliminating the requirement of performing a hypothetical purchase price allocation. Instead, impairment will be measured using the difference between the carrying amount and fair value of the reporting unit. The amended guidance also eliminates the requirement for any reporting unit with a zero or a negative carrying amount to perform a qualitative assessment and will require disclosure of the amount of goodwill allocated to each reporting unit with a zero or a negative carrying amount of net assets. This standard will be effective beginning in the first quarter of fiscal year 2022, for emerging growth companies. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The standard is to be applied prospectively. The Company is evaluating the impact that adoption of this new standard will have on its financial statements.

In May 2017, the FASB issued ASU No. 2017-09, "Compensation – Stock Compensation: Scope of Modification Accounting." This ASU is intended to provide guidance about which changes to the terms or conditions on a share-based payment award require an entity to apply modification accounting. This new standard is effective for reporting periods beginning after December 15, 2018, and interim periods within that reporting period, for emerging growth companies, with early adoption permitted. The Company does not expect these amendments to have a material effect on its financial statements.

Except as noted above, the guidance issued by the FASB during the current period is not expected to have a material effect on the Company's financial statements.

Note 7. Litigation and Contingencies

The Company is involved in various legal proceedings, including product liability, general liability, workers' compensation liability, and employment litigation, which have arisen in the normal course of operations. The Company is insured for product liability, general liability, workers' compensation, employer's liability, property damage and other insurable risk required by law or contract, with retained liability or deductibles. The Company has recorded and maintains an estimated liability in the amount of management's estimate of the Company's aggregate exposure for such retained liabilities and deductibles. For such retained liabilities and deductibles, the Company determines its exposure based on probable loss estimations, which requires such losses to be both probable and the amount or range of probable loss to be estimable. The Company believes it has made appropriate and adequate reserves and accruals for its current contingencies. On May 11, 2017, the Company obtained insurance coverage for product liability exposures, certain exposures related to general, workers' compensation and automobile liability, catastrophic losses as well as those risks required to be insured by law or contract. The Company's workers' compensation policies have a \$250 per claim deductible with a \$1,000 aggregate deductible. The Company also maintains an occurrence based product liability policy with a \$500 per claim self-insured retention.

Note 8. Supplemental Cash Flow Information

Interest and income taxes paid during the three months ended March 31, 2018 and 2017 are as follows:

	For the Three Months Ended	
	March 31,	
	2018	2017
Interest paid in cash	<u>\$ 361</u>	<u>\$ 681</u>
Income tax payments in cash	<u>\$ 20</u>	<u>\$ —</u>

The Company settled an accrued liability in exchange for stock during the quarter with a fair value of \$79, which resulted in a non-cash decrease in accrued liabilities and increase in stockholders' equity.

Note 9. Debt

Loan Facilities

On December 23, 2016, the Company completed a unitranche credit agreement with PNC Bank, National Association ("PNC"), and White Oak Global Advisors, LLC ("White Oak") to provide a \$65,000, 5-year credit facility (the "Credit Agreement"). The facility consisted of a \$35,000 revolving credit facility (subject to availability based primarily on eligible accounts receivable and eligible inventory), a Term Loan A facility of \$8,500 and a Term Loan B facility of \$21,500. A total of \$46,700 was drawn by the Company at closing of the Credit Agreement.

On December 27, 2017 the Company entered into an amended and restated credit agreement with PNC Bank, National Association, and another lender (the "Lenders") to provide a \$50,000, 5-year credit facility (the "Credit Agreement"). The facility consists of a \$35,000 revolving credit facility (which is subject to availability based primarily on eligible accounts receivable and eligible inventory), and a term loan facility of \$15,000. At the closing of the Credit Agreement, the Company had outstanding borrowings under it of approximately \$28,400, consisting of \$18,700 in new borrowings and approximately \$9,700 which was carried over from the Company's previously outstanding revolving credit facility.

Revolving Loan Facility with PNC

The Company's \$35,000 revolving loan facility with PNC includes two sub-facilities: (i) a \$2,000 letter of credit sub-facility, and (ii) a \$3,500 swing loan sub-facility, each of which is fully reserved against availability under the revolving loan facility. The facility matures on December 27, 2022.

The \$35,000 revolving loan facility is a secured financing facility under which borrowing availability is limited to existing collateral as defined in the agreement. The maximum amount available is limited to (i) the sum of (a) up to 85% of Eligible Receivables, plus (b) 90% of Eligible Insured Foreign Receivables, plus (c) the lesser of (I) 95% of Eligible CAT Receivables, or \$8,600 plus (ii) the lesser of (A) the sum of (I) up to 65% of the value of the Eligible Inventory (other than Eligible Inventory consisting of finished goods machines and service parts that are current), plus (II) 80% of the value of Eligible inventory consisting of finished goods machines, plus (III) 75% of the value of Eligible Inventory consisting of service parts that are current) or, (B) up to 90% of the appraised net orderly liquidation value of Eligible Inventory. Inventory collateral is capped at \$15,000 less outstanding letters of credit and any reasonable reserves as established by the bank. At March 31, 2018, the maximum the Company could borrow based on available collateral was capped at \$17,422.

At March 31, 2018, the Company had drawn \$13,594 under the \$35,000 revolving loan facility. The Company can opt to pay interest on the revolving credit facility at either a domestic rate plus a spread, or a LIBOR rate plus a spread. The domestic rate spread is initially fixed at 1.00% for revolving loan advances until delivery of certain reporting documents with respect to fiscal quarter ending March 31, 2018, at which point it ranges from 1.00% to 1.5% depending on the Average Undrawn Availability (as defined in the New Credit Agreement). The LIBOR spread is initially fixed at 2.00% for revolving loan advances until delivery of the same reporting documents, at which point it ranges from 2.00% to 2.5% depending on the Average Undrawn Availability. Funds borrowed under the LIBOR options can be borrowed for periods of one, two, or three months. The weighted average interest rate for the period ended March 31, 2018 was 4.1%. Additionally, the bank assesses a 0.25% unused line fee that is payable quarterly.

Term Loan A with PNC

On December 23, 2016, the Company entered into an \$8,500 term loan ("Term Loan A") facility with PNC as the administrative agent.

The Company repaid this facility on May 18, 2017.

Term Loan B with White Oak

On December 23, 2016, the Company entered into a \$21,500 term loan ("Term Loan B") facility with White Oak as the administrative agent.

The Company repaid this facility on December 27, 2017.

Term Loan C with PNC

On December 27, 2017 the Company entered into a \$15,000 term loan ("Term Loan C") facility, with PNC as the administrative agent.

At March 31, 2018, the Company had an outstanding balance of \$14,500, less \$319 debt issuance costs, for net debt of \$14,181. The Company can opt to pay interest on the Term Loan C facility at either a domestic rate plus a spread, or a LIBOR rate plus a spread. For term loan advances the domestic rate spread is fixed at 3.75%, and the LIBOR spread is fixed at 4.75%. Funds borrowed under the LIBOR options can be borrowed for periods of one, two, or three months. The weighted average interest rate for the period ending March 31, 2018 was 6.4%.

The Company is obligated to make quarterly principal payments of \$500 commencing on January 1, 2018. If the term loan is prepaid in full or in part prior to the maturity date, the Company will be required to pay a prepayment penalty. If paid prior to December 27, 2018 the prepayment penalty will be equal to 2.0% of the prepayment. The prepayment penalty percentage reduces to 1% on or after December 27, 2018, and no penalty if on or after the December 27, 2019. There will be no prepayment obligation in the event that the prepayment of the obligation in full is funded in connection with a refinancing for which PNC is the administrative agent. Any unpaid principal is due on maturity, which is December 27, 2022. Interest is payable monthly beginning on January 1, 2018.

Covenants

The Company's indebtedness is collateralized by substantially all of the Company's assets. The facilities contain customary limitations including, but not limited to, limitations on additional indebtedness, acquisitions, and payment of dividends. The Company is also required to comply with certain financial covenants as defined in the New Credit Agreement. The revolving credit facility and the term loans require the Company to maintain a Minimum Fixed Charge Coverage ratio of not less than 1.20 to 1.0. Additionally, the term loans require the Company not exceed a Leverage Ratio of 3.50 to 1.00 which shall step down to 1.75 to 1.00 by December 31, 2020 and also limits capital expenditures to \$2,000 in any fiscal year. The Company was in compliance with all covenants for the period ended March 31, 2018.

Note 10. Equity

2017 Equity Incentive Plan

On May 11, 2017, the Company adopted the ASV Holdings, Inc. 2017 Equity Incentive Plan (the "2017 Plan"). The maximum number of shares of common stock reserved for issuance under the 2017 Plan is 1,250 shares. The total number of shares reserved for issuance however, can be adjusted to reflect certain corporate transactions or changes in the Company's capital structure. The Company's employees and members of the board of directors who are not the Company's employees or employees of the Company's affiliates are eligible to participate in the 2017 Plan. The 2017 Plan is administered by the compensation committee of the Company's board of directors. The 2017 Plan provides that the committee has the authority to, among other things, select plan participants, determine the type and amount of rewards, determine the award terms, fix all other conditions of any awards, interpret the plan and any plan awards. Under the 2017 Plan, the committee can grant stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and performance units. The 2017 Plan requires that the exercise price for stock options and stock appreciation rights be not less than fair market value of the Company's common stock on date of grant.

The Company awarded a total of 10 restricted stock units to directors and non-employees under the 2017 Plan on March 15, 2018. The restricted stock units are subject to the same conditions as the restricted stock awards except the restricted stock units will not have voting rights and the common stock will not be issued until the vesting criteria are satisfied.

The following table contains information regarding restricted stock units:

	March 31, 2018
Outstanding on December 31, 2017	166
Units granted during the period	1
Vested and issued	(24)
Vested- issued and repurchased for income tax withholding	6
Forfeited	-
Outstanding on March 31, 2018	149

On March 15, 2018, the Company granted an aggregate of 9 restricted stock units to directors pursuant to the 2017 Plan. Restricted stock units were immediately vested.

On March 15, 2018, the Company granted 1 restricted stock unit to a non-employee pursuant to the 2017 Plan. Restricted stock units vest on March 15, 2018, 2019 and 2020, respectively.

The value of the restricted stock is being charged to compensation expense over the vesting period. Compensation expense includes expense related to restricted stock units of \$149 and \$0 for the three months ended March 31, 2018 and 2017, respectively. Additional compensation expense related to restricted stock units will be \$439, \$394, and \$238 for the remainder of 2018, 2019, and 2020, respectively.

Note 11. Subsequent Events

None.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with the consolidated financial statements and the notes to those statements included in this Quarterly Report on Form 10-Q. This discussion and analysis may contain forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, such as those set forth under the caption “Risk Factors,” in our 2017 Annual Report on Form 10-K for the fiscal year ended December 31, 2017, in the section entitled “Item 1A. Risk Factors”.

Cautionary Statement Regarding Non-GAAP Measures

This “Management’s Discussion and Analysis of Financial Condition and Results of Operations” section contains references to “EBITDA”. EBITDA is defined for the purposes of this Quarterly Report on Form 10-Q as net income or loss before interest, income taxes, depreciation and amortization. Management believes that EBITDA is a useful supplemental measure of our operating performance and provides meaningful measures of overall corporate performance exclusive of our capital structure and the method and timing of expenditures associated with building and placing our products. EBITDA is also presented because management believes that it is frequently used by investment analysts, investors and other interested parties as a measure of financial performance.

However, EBITDA is not a recognized earnings measure under generally accepted accounting principles of the United States (“U.S. GAAP”) and does not have a standardized meaning prescribed by U.S. GAAP. Therefore, EBITDA may not be comparable to similar measures presented by other issuers. Investors are cautioned that EBITDA should not be construed as an alternative to net income or loss or other income statement data (which are determined in accordance with U.S. GAAP) as an indicator of our performance or as a measure of liquidity and cash flows. Management’s method of calculating EBITDA may differ materially from the method used by other companies and accordingly, may not be comparable to similarly titled measures used by other companies.

Overview

ASV Holdings, Inc. (formerly A.S.V., LLC) (“ASV” the “Company,” “we,” “our” and/or “us”) designs and manufactures a broad range of high quality compact track loader (“CTL”) and skid steer loader (“SSL”) equipment, marketed through a distribution network in North America, Australia and New Zealand under the ASV and Terex brands. We also serve as a private label original equipment manufacturer (“OEM”) for several manufacturers. Our products are used principally in the construction, agricultural and forestry industries. As a full-service manufacturer, we provide pre- and post-sale dealer support, after-sale technical support and replacement parts supplied from our dedicated logistics center. We also supply a limited version of our assembled undercarriage sets that exclude the suspension to Caterpillar for three versions of Caterpillar’s multi-terrain CTL machines marketed under the CAT brand under a supply contract with Caterpillar.

Background:

A.S.V., Inc. was founded in 1983 and launched its first CTL machine in 1990. It launched as a publicly-traded company on NASDAQ in 1994 and operated as a public company until it was acquired by Terex Corporation (“Terex”) on March 3, 2008. On December 19, 2014, Manitex International, Inc (“Manitex”) purchased 51% of ASV from Terex pursuant to a joint venture arrangement with Terex (the “Joint Venture”). On December 23, 2014, A.S.V., Inc. was converted to a Minnesota limited liability company and its name was changed to A.S.V., LLC. The terms of the Joint Venture and objectives of ASV management included the following:

- We agreed to operate as a private label original equipment manufacturer of ASV products under the Terex brand name, and Terex agreed to market the ASV products through the Terex distribution network.
- We were permitted to re-launch the ASV brand and establish an independent ASV North American dealer network managed directly by dedicated ASV regional account sales managers. Our independent dealers would be located in areas where Terex had no presence and would therefore be complementary to the Terex network. Terex would provide marketing and product line management resources to support the ASV brand.
- We agreed to directly manage our master distributor and overseas dealers in Australia and New Zealand, and national accounts such as Caterpillar.

- Terex agreed to support ASV's efforts to penetrate large rental equipment dealers by utilizing the wider Terex group dealer relationships.
- We would continue to convert our ASV products to the Environmental Protection Agency's ("EPA") Tier 4 Final emissions standard, which are a set of emissions requirements established by the EPA to reduce emissions of particulate matter, oxides of nitrogen and air toxics from certain types of engines.

Since the inception of the Joint Venture in December 2014, we have achieved the following:

- Beginning in the second quarter of 2015, we re-launched the ASV brand with a new logo and newly designed product range of four CTLs and four SSL machines. As of March 31, 2018, we are marketing 12 CTL and SSL products under the ASV brand.
- We have established our own sales organization, with a National Sales Manager for North America, seven ASV sales account managers and 151 North American ASV dealers and rental accounts with 248 locations in 44 U.S. states and six Canadian provinces as of March 31, 2018.
- We have grown the ASV distribution network while seeing a decline in activity from dealers in the Terex network. During 2017, 97% of our machine sales were made through our distribution network and 3% through Terex distribution. Beginning in 2018, all sales will be made through our ASV distribution network.

On May 11, 2017, in connection with the Company's initial public offering ("IPO"), we converted from a Minnesota limited liability company into a Delaware corporation and changed our name from A.S.V., LLC to ASV Holdings, Inc., which we refer to herein as the "LLC Conversion". In conjunction with the LLC Conversion,

- all of our outstanding units converted into shares of our common stock, based on the relative ownership interests of our pre-IPO equity holders as set forth in the A.S.V., LLC limited liability company agreement;
- we adopted and filed a certificate of incorporation and certificate of conversion with the Secretary of State of the State of Delaware; and
- we adopted and filed a plan of conversion and articles of conversion with the Secretary of State of the State of Minnesota.

Business Outlook

A number of economic indicators that we believe are relevant to our industry and products have been trending favorably and are forecasted to continue in a positive direction. A primary driver of demand for our CTL and SSL products is the United States housing market, where the level of new housing starts continues to be below pre-2007 levels. Since 2009, according to the U.S. Census Bureau, new housing starts have incrementally increased to a seasonally adjusted annual rate of 1.3 million units in March 2018 from approximately 0.5 million in October 2009. This March 2018 rate is 10.9% above the March 2017 rate.

Construction spending in the United States is also experiencing growth. The U.S. Census Bureau reported on April 2, 2018 that total construction spending during February 2018 was estimated at a seasonally adjusted annual rate of \$1.3 trillion, 3.0% above the February 2017 estimate.

The economies of the markets to which we sell our products have for the past few years operated with interest rates at historically low levels. Interest rate changes affect overall economic growth, which affects demand for residential and nonresidential structures which in turn affects sales of our products that serve these activities. Interest rate changes also affect the ability of dealers to finance machine purchases, can change the optimal time to keep machines in a fleet and can impact the ability of our suppliers to finance the production of parts and components necessary to manufacture and support our products. In the United States, during 2017 and early 2018, the Federal Reserve continued increasing interest rates from their historically low levels. Increases in interest rates could negatively impact our sales and create supply chain inefficiencies.

Factors Affecting Revenues and Gross Profit

We derive most of our revenue from purchase orders from dealers and distributors. The demand for our products depends upon the general economic conditions of the markets in which we compete, residential housing starts, general construction activity and upon dealer and end-user replacement or repair cycles. Adverse economic conditions may cause dealers or end-users to forego or postpone new purchases in favor of repairing existing machinery. In addition to the United States, we sell to dealers in Canada, Australia and New Zealand. All of our sales are denominated in U.S. dollars. The strengthening of the U.S. dollar against these other currencies may have a negative impact on sales volume and sales prices to dealers outside of the United States.

Factors that affect gross profit include product mix, production levels and cost of raw materials. Margins tend to increase when sales are skewed towards larger, tracked machines and replacement parts. As a consequence, gross profit margins can vary from period to period. Replacement parts generally command higher margins than product sales.

Results of Operations

Three Months Ended March 31, 2018 Compared to Three Months Ended March 31, 2017

For the three months ended March 31, 2018, the Company had net income of \$(0.3) million compared to a net income of \$0.2 million for the three months ended March 31, 2017.

For the three months ended March 31, 2018, net income of \$(0.3) million consisted of revenue of \$29.9 million, cost of sales of \$25.9 million, research and development costs of \$0.5 million, selling, general and administrative (“SG&A”) expenses of \$3.4 million, interest expense of \$0.5 million, and an income tax benefit of \$0.1 million.

For the three months ended March 31, 2017, the net income of \$0.2 million consisted of revenue of \$28.0 million, cost of sales of \$23.7 million, research and development costs of \$0.5 million, SG&A expenses of \$2.7 million, and interest expense of \$0.9 million.

Net Sales: For the three months ended March 31, 2018, net sales were \$29.9 million, an increase of approximately \$1.9 million or 6.8% from net sales of \$28.0 million for the same period in 2017. The increase in net sales is attributable to increased machine sales of \$2.5 million and an increase in sales of undercarriages to Caterpillar of \$0.5 million, offset by a decrease in aftermarket parts of \$1.1 million. Growth in revenues from sales of machines through our North American distribution channels was 31% compared to the three months ended March 31, 2017.

Increased machine volume and an improved machine mix of larger higher revenue models in the three months ended March 31, 2018, resulted in an increase in machine revenues of 13.5% or \$2.5 million from the same period in 2017. The increase in volume was primarily due to increased sales into our North American distribution channels, offset in part by fewer units shipped into Australia and New Zealand for the period. There was no material impact due to price increases for the three months ended March 31, 2018.

Parts and other sales for the three months ended March 31, 2018 decreased \$0.6 million compared to the same period in 2017. This comprised an increase of Caterpillar undercarriage shipments of \$0.5 million for the period, offset by a decrease in aftermarket parts sales of \$1.1 million for the period. We believe a primary reason for the aftermarket parts decrease was related to the transition of our aftermarket parts distribution to Grand Rapids, Minnesota, as dealers held orders for a window of time until the transition was complete. We began distributing aftermarket parts out of our new distribution facility on March 19, 2018.

Gross Profit: For the three months ended March 31, 2018, our gross profit was \$3.9 million or 13.0% of net sales compared to \$4.4 million or 15.7% of net sales for the same period in 2017. Gross profit as a percent of net sales decreased primarily as a result of (i) a decrease in aftermarket parts as a percentage of total sales, and (ii) start-up costs of \$0.6 million associated with moving our parts distribution to Grand Rapids.

Research and Development: Research and development expense was \$0.5 million or 1.7% of net sales for the three months ended March 31, 2018, compared to \$0.5 million or 1.8% of net sales for the same period in 2017.

Selling, general and administrative expense: SG&A expense for the three months ended March 31, 2018 was \$3.4 million or 11.4% of net sales, compared to \$2.7 million, or 9.6% of net sales, for the comparable period in 2017, an increase of approximately \$0.7 million or 25.9%, respectively. The main contributing factors to the increase were (i) a \$0.1 million increase from costs associated with stock compensation, (ii) a \$0.4 million increase resulting from costs associated with operating as a public company, (iii) a \$0.1 million increase in general administrative costs relating to adding key management positions, and (iv) a \$0.1 million increase in advertising and marketing costs.

Operating Income: For the three months ended March 31, 2018, our operating income was \$0.1 million or 0.3% of net sales, compared to \$1.1 million or 3.9% of net sales for the same period in 2017. Operating income decreased due to the explanations above.

Interest expense: Interest expense, including amortization of debt issuance costs, for the three months ended March 31, 2018, was \$0.5 million compared to \$0.9 million for the same period in 2017, principally due to lower borrowings on our debt facilities, pay down of debt from IPO proceeds and improved rates, a result of refinancing our debt in December of 2017.

Tax: For the three months ended March 31, 2018, the Company recorded an income tax benefit of \$0.1 million, which consists of a federal and state income tax benefit. For the three months ended March 31, 2017, the Company did not record an income tax provision as prior to May 11, 2017, the Company was taxed as a partnership.

Net income: For the three months ended March 31, 2018, our net loss was \$(0.3) million compared to a net income of \$0.2 million for the same period in 2017, a decrease of \$(0.5) million and is attributable to the items discussed above.

EBITDA:

EBITDA totaled \$1.3 million or 4.2% of net sales for the three months ended March 31, 2018 compared to \$2.3 million or 8.3% of net sales for the same period in 2017. The decrease in EBITDA for the three months ended March 31, 2018 compared to the three months ended March 31, 2017 resulted from decreased net income of \$0.5 million, reduced interest charges of \$0.4 million, and a tax benefit of \$0.1 million.

The table below sets forth a reconciliation of Net (loss) income to EBITDA (in thousands of dollars):

	For the Three Months Ended March 31,	
	2018	2017
Net (loss) income	\$ (307)	\$ 232
Interest expense	458	878
Depreciation & amortization	1,184	1,221
Other (income) expense	(6)	—
Income tax (benefit) expense	(81)	—
EBITDA (1)	\$ 1,248	\$ 2,331
% of Sales	4.2 %	8.3 %

(1) EBITDA is defined as income or loss before interest, income taxes, depreciation and amortization. EBITDA is not a recognized measure under U.S. GAAP and does not have a standardized meaning prescribed by U.S. GAAP. Therefore, EBITDA may not be comparable to similar measures presented by other companies. The table above reconciles net income to EBITDA. See “— Cautionary Statements Regarding Non-GAAP Measures” for further information regarding EBITDA.

Liquidity and Capital Resources

We fund our business activities by utilizing a revolving credit facility, a term loan for financing, and cash generated from operations. For more information, see Note 9, “Debt” to the unaudited condensed financial statements included elsewhere in the Quarterly Report on Form 10-Q and “Item 3. Quantitative and Qualitative Disclosures About Market Risk” below.

We use our capital resources to:

- fund operating costs;
- fund capital requirements, including capital expenditures;
- make debt and interest payments; and
- invest in new ventures.

We need cash to meet our working capital needs as the business grows, to acquire capital equipment, and to fund acquisitions and debt repayment. We intend to use cash flows from operations and existing availability under the current revolving credit facility to fund anticipated levels of operations for the next twelve months. As our availability under our credit lines is limited, it is important that we manage our working capital. We may need to raise additional capital through debt or equity financings to support our growth strategy, which may include additional acquisitions. There is no assurance that such financing will be available or, if available, on acceptable terms.

Cash Flows

Three Months Ended March 31, 2018

Operating activities consumed \$0.2 million of cash for the three months ended March 31, 2018, comprised of a net loss of \$(0.3) million, non-cash items that totaled \$1.5 million and changes in assets and liabilities, which consumed \$1.4 million. The principal non-cash items are depreciation and amortization of \$1.2 million, share-based compensation of \$0.1 million, and an increase in inventory reserves of \$0.1 million.

The changes in assets and liabilities consumed \$1.4 million. The changes in assets and liabilities had the following impact on cash flows: Accounts receivable generated \$1.2 million, trade receivables/payables from affiliates generated \$0.2 million, inventory consumed \$1.5 million, prepaid expenses generated \$0.2 million, trade accounts payable consumed \$0.6 million, and accrued expenses consumed \$0.8 million. The increase in accounts receivable is principally due to increased sales. Days sales outstanding at March 31, 2018 were 49 days, compared to 58 days at December 31, 2017. The increase in inventory relates primarily to increased stock of long lead items to support future production schedules as well as safety stock used to supplement aftermarket parts distribution during the transition period of moving of the parts to our new facility in Grand Rapids. The fluctuation in the remaining assets and liabilities are within a range that would normally be expected to occur.

Investing activities for the three months ended March 31, 2018 consumed \$0.3 million of cash. We consumed \$0.3 million of cash to purchase machinery and equipment, principally related to tooling for Tier IV, information technology systems upgrades and building improvements.

Financing activities generated \$0.5 million in cash for the three months ended March 31, 2018. Cash was generated by increased borrowing under the revolving credit facilities of \$1.0 million, offset by the use of \$0.5 million of cash for principal payments on debt.

Three Months Ended March 31, 2017

Operating activities consumed \$1.1 million of cash for the three months ended March 31, 2017 comprised of a net income of \$0.2 million, non-cash items that totaled \$1.4 million and changes in assets and liabilities, which consumed \$0.5 million. The principal non-cash items are depreciation and amortization of \$1.2 million, amortization of deferred finance cost of \$0.1 million, loss on sale of fixed assets of \$0.04 million and an increase in allowance for doubtful accounts of \$0.04 million.

The changes in assets and liabilities consumed \$0.5 million. The changes in assets and liabilities had the following impact on cash flows: Accounts receivable consumed \$1.4 million, trade receivables/payables from affiliates generated \$0.3 million, inventory generated \$2.4 million, prepaid expenses consumed \$0.4 million, trade accounts payable consumed \$0.4 million, accrued expenses consumed \$1.3 million and other long-term liabilities generated \$0.4 million. The increase in accounts receivable is principally due to increased sales. Days sales outstanding at March 31, 2017 were 42 days, compared to 63 days at December 31, 2016. The decrease in inventory relates to material on hand at the end of the period December 31, 2016 for product to be manufactured for international shipments in the first quarter of 2017, together with a \$1.0 million decrease in finished product. The \$1.3 million reduction in accrued expenses related principally to \$1.0 million for product liability and \$0.1 million for reduced legal accrual and \$0.1 million of accrued interest. The decrease in trade accounts payable relates to a reduction of twenty-one days in days payable outstanding at March 31, 2017 compared to December 31, 2016. The fluctuation in the remaining assets and liabilities are within a range that would normally be expected to occur.

Investing activities for the three months ended March 31, 2017 generated \$0.5 million of cash representing the purchase of machinery and equipment.

Financing activities consumed \$2.2 million in cash for the three months ended March 31, 2017. We used \$0.5 million of cash for principal payments on debt and repaid \$1.7 million on our existing revolving credit facility.

Critical Accounting Policies and Estimates

Our financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which require us to make estimates, judgments and assumptions that affect the reported amounts of certain assets, liabilities, revenues, expenses and related disclosures and contingencies. We evaluate estimates used in preparation of our financial statements on a continual basis. The Company adopted ASC 606 during the period, however, it had no significant impact on estimates. There have been no other significant changes to our critical accounting policies that are described in "Management's Discussion and Analysis of Financial Condition and Results of Operations – Summary of Significant Accounting Policies" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Off-Balance Sheet Arrangements

At March 31, 2018 we had \$0.2 million of standby letters of credit outstanding. PNC Bank has issued a \$0.2 million standby letter of credit in favor of an insurance carrier to secure obligations which may arise in connection with future deductible payments that may be incurred under our workers' compensation insurance policies.

Inflation

Inflation affects us in two principal ways. First, our revolving credit facility is generally tied to the price and LIBOR interest rates so that increases in those interest rates would be translated into additional interest expense. Second, general inflation impacts prices paid for labor, parts and supplies. Whenever possible, we attempt to cover increased costs of production and capital by adjusting the price of our products. However, we generally do not have inflation-based price adjustment provisions in our contracts. The markets we serve are competitive in nature, and competition may limit our ability to pass through cost increases. Overall, we strive to manage the effect of inflation through sales price adjustments, cost reductions and improved productivity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to certain market risks that exist as part of our ongoing business operations.

Interest Rate Risk

We are exposed to interest rate volatility with regard to future issuances of fixed rate debt and existing issuances of variable rate debt. Primary exposure includes movements in the PNC prime rate and LIBOR. At March 31, 2018, we had approximately \$28.1 million of variable rate debt with a weighted average interest rate of approximately 5.29%. An increase of 1% in our average floating interest rates at March 31, 2018 would increase interest expense by approximately \$0.3 million.

Commodities Risk

We purchase a majority of our components as partially and fully finished assemblies, rather than raw materials for conversion. However, steel is a major part of the chassis, cabs and wheel rims of our product and as such availability and pricing from our suppliers is subject to the global steel market. Extreme movements in the cost and availability of steel and other materials and components may affect our financial performance. The prices we pay for raw materials used in our products may be impacted by tariffs. On March 8, 2018, the Trump Administration signed an order that will impose tariff of 25% on steel. As a result of this tariff, if we are unable to obtain raw materials, including steel, at historical prices or unable to pass any material price increases on to dealers, our margins could be adversely affected and it could have a material adverse effect on our business. Changes in input costs did not have a significant effect on our operating performance in 2017 or the three months ended March 31, 2018. During 2017 and during the three months ended March 31, 2018, raw materials and component were generally available to meet our production schedules and had no significant impact on our revenues.

In the absence of labor strikes or other unusual circumstances, the materials and components used in our products are normally available from multiple suppliers. However, some of the components may not be easily interchanged with components from alternative suppliers and have been designed into our products. We evaluate current and potential suppliers on a regular basis on their ability to meet our requirements and standards. We actively manage our material supply sourcing, and may employ various methods to limit risk associated with commodity cost fluctuations and availability. The inability of suppliers to deliver materials and components promptly could result in production delays and increased costs to manufacture our products. To mitigate the impact of these risks we continue to search for acceptable alternative supply sources and less expensive supply options on a regular basis.

Item 4. Controls and Procedures.

Management's Evaluation of our Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is (1) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and (2) accumulated and communicated to our management, including our principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

As of March 31, 2018, our management, with the participation of our principal executive officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit

relationship of possible controls and procedures. Our principal executive officer and principal financial officer have concluded based upon the evaluation described above that, as of March 31, 2018, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

Beginning January 1, 2018, we implemented ASU 2014-09 Revenue from Contracts with Customers (Topic 606) and ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date. Although the adoption of the new revenue standard had no significant impact on our results of operations, cash flows, or financial position, we did implement changes to our controls related to revenue. These included the development of new policies based on the five-step model provided in the new revenue standard, enhanced contract review requirements, and other ongoing monitoring activities. These controls were designed to provide assurance at a reasonable level of the fair presentation of our condensed consolidated financial statements and related disclosures. There was no other change in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings.

We are involved in various legal proceedings, including the proceeding before the National Labor Relations Board described in “Risk Factors—Risks Related to Our Business” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017. We are also involved in products liability and workers’ compensation matters which have arisen in the normal course of our business operations.

Item 1A. Risk Factors.

As of the date of this filing, there have been no material changes from the risk factors disclosed in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.

See the Exhibit Index set forth below for a list of exhibits included with this Quarterly Report on Form 10-Q.

Exhibit Number	Description
2.1	<u>Plan of Conversion of A.S.V. LLC, dated as of April 25, 2017 (incorporated by reference to Exhibit 2.1 to the Company’s Current Report on Form 8-K filed on May 18, 2017).</u>

* Filed herewith.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of ASV Holdings, Inc. (the "Company") on Form 10-Q for the period ending March 31, 2018 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: May 8, 2018
